## High-brightness LED panel transilluminator LPM-P series

High-brightness LED transillumination with high density of chip LEDs Brightness and uniformity: luminance: 20,000 cd/m2 Illuminance: 60,000 Lux, 85% or more (25-segment center point measurement) Wide line illumination type and surface illumination type are available.

## Use

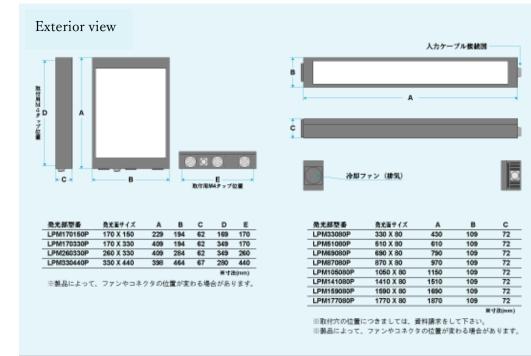

- Inspection of pinholes, bubbles, foreign matter, etc. in transparent and semi-transparent objects such as glass and synthetic resin products as backlight illumination.
- Inspection light source for LCD inspection process, substrate process, optical characteristic inspection process, lighting inspection process
- Presence/absence inspection, shape inspection, and dimensional inspection by silhouette using backlight light
- Inspection of optical films and sheets
- Inspection for camera module evaluation

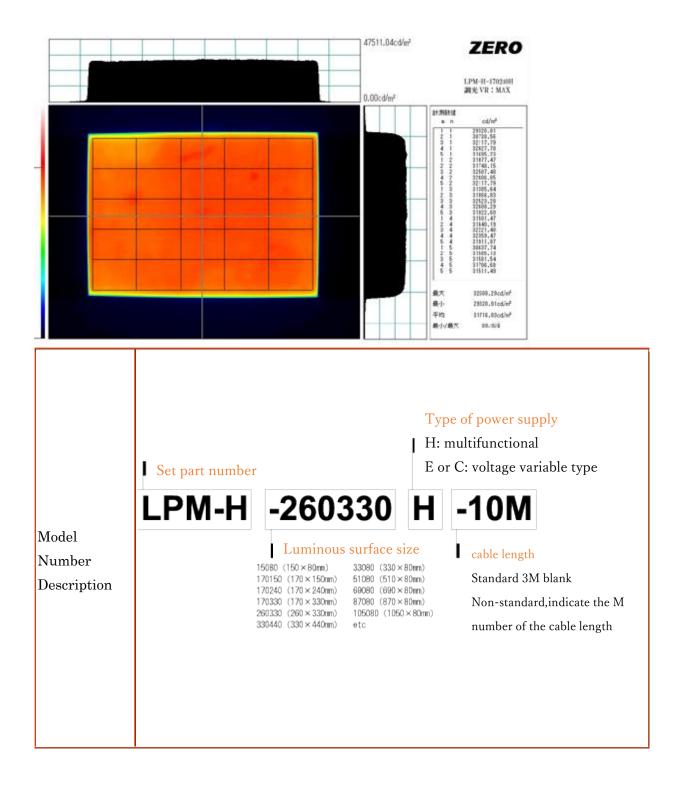

## Feature

- High brightness and highly uniform surface illumination
- Power supplies are available in multifunctional and voltage-variable types
- Forced-air cooling with fan
- Custom sizes are also available.
- Provides lighting with a luminous surface size to suit the customer by using 180 x 90 mm LED panels
- Luminous surfaces other than catalog sizes can be manufactured.
- The standard color is 5000K white, but R (red), G (green), B (blue), bulb color, and white with high color rendering specification (Ra95) can also be manufactured.

## Light emitting part specifications

Model name			
	Luminous surface size		
LED emission color	Standard: white (5000K), colors to order: RGB, bulb color, 6500K, high color rendering specification, UV		
Exterior Material	Aluminum/acrylic material (diffusion plate)		
Cooling method	Forced air cooling (fan)		
life span	Rated life of 30,000 hours *Not a guaranteed value		
luminance	20,000cd/m2 or more		
uniformity	90% or more (measured in 9 segments)		
Dimming range	0~100%		
Operating temperature range	0°C∼40°C		
Operating humidity range	20~75%		
Storage temperature range	-10℃~75℃		
Storage humidity range	20~75%		

Order No.

Set Model No.	breakdown model number

LPM-H-177080H	LPM177080P	RVC60PT200-LPM	ВСМЗНМ-Т1-РТ200	

%Standard cable length is 3M. If you require an extension (4M or longer),

Please indicate the number of meters required, such as -10M, at the end of the model number.

The maximum length is up to 10 m. Please consult with us if you need more than 10 m.

% If you want to make the power supply section variable voltage, change "H" after the set model number to "C".

Example: LPM-H-260330H  $\rightarrow$  LPM-H-260330C
