Our LED power supplies are available in PWM dimming and variable voltage specifications.

■ Automatically adapts to AC100V to 240V, 50/60Hz input voltage Standard shipment comes with a plug for AC100V.

If you require a plug shape other than AC100V, please specify.

| AC plug cord type | | | | | |
|-------------------|--|--|--|--|--|
| SVT | Includes 3-pin adapter for 120 VAC and 2-pin | | | | |

| BS | UK Code | | | | |

RVC60PT100/RVC60PT200 (multifunctional)

- Two light emitters can be connected to one power supply. Ideal for wide-area irradiation. The -LPM specification is one light emitter per power supply.
- Two rotary switches (ROUGH and FINE) can be used to control the dimming. 256 steps of 78 kHz PWM dimming / dimming range 0 to 100%.
- 8bit 256 gradation dimming / Analog 0-4.5V dimming ON-OFF control is possible by external control terminal.
- Output cable can be extended up to 10m
- Two external control terminals allow external light on/off control and digital/analog dimming
- Built-in universal power supply
 Automatically adapts to AC100V to 240V, 50/60Hz input voltage.
 For customers other than 100 VAC, please specify AC plug. (See AC plug above)

RVC100-R(simplified form)

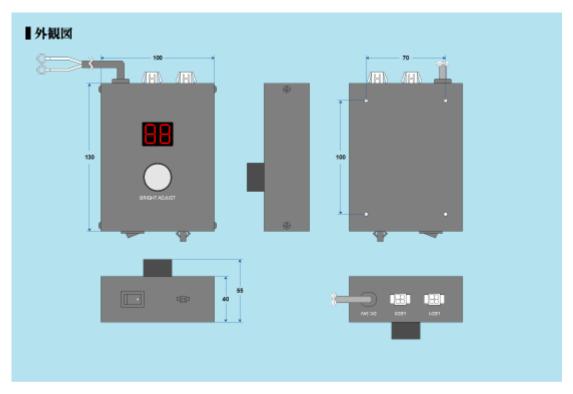

This controller is designed for 24VDC input.

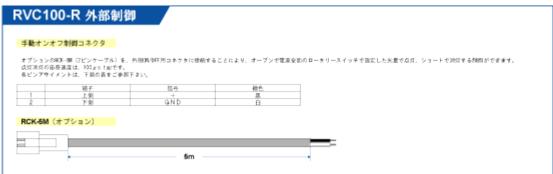

- 24VDC input specification
- Easy operation by digital display controller
- ON/OFF function via external terminal
- Cable length can be extended up to 10M between the controller and the main body of the light.

EPD6A-LC-R(voltage-variable type)

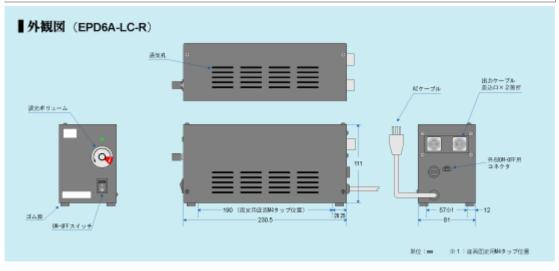

Variable voltage power supply for line sensor cameras and fast shutter speeds.

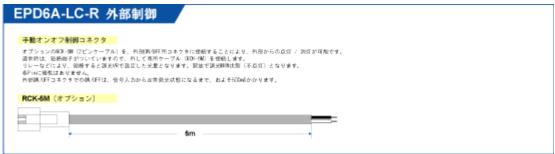

- Worldwide input voltage range from 100 VAC to 240 VAC.
- Equipped with 2-channel output terminals. Simultaneous lighting of multiple lamps is possible by cable modification.
- 0 to 135% dimming function. Simultaneous dimming of all lamps possible.
- High efficiency characteristics even at low output, resulting in very high power consumption reduction.
- ON/OFF function via external terminal
- Cable length can be extended up to 10m from the power supply to the main body of the light.

DLC03W-LD-LCG/ DLC06W-LD-LCG(Voltage-variable type: High-capacity type)

- Dimming function by 10-turn volume with lock mechanism.
- Voltage monitor display enables confirmation of output voltage.
- Input voltage can be set from 100 VAC to 240 VAC.
- ON/OFF and analog 0 to 5V voltage dimming control by external control.
- Cable length can be extended up to 10M from the power supply to the main body of the light.
